## Volunteer work

Event Staff, Imagineware | 2017

Helped to organize activities and
events for programming and
IT-related topic divulgation

## About Me

My studies have given me an interdisciplinary vision that I seek to
apply to my work. I am a proactive, motivated, and hard-working
person. I am driven by results and have a strong sense of
responsibility and reliability.

My international experience allows me, in addition to improving my
interpersonal skills, to adapt quickly to new environments.

My ambitions include developing my technical skills and growing a
career helping companies improve their operations through the
application of innovative technologies, either from software
development or IT consulting.

## Experience

### Software Development Intern, Tecnatom
### Summer 2021 (June-August)

Software development for nuclear power plant inspection. Some of
my responsibilities were:
- Software development for the implementation of new
functionalities in an Android application
- Code development for the detection of text by image processing
- Research on programs for the automation of acceptance tests
- Device management: SW installation, testing, updating and
debugging

### Private Tutor | 2018 – 2020

Two years of experience helping students from middle school up to
University in fields like Mathematics, Physics or Programming

## Education
